- Small & Medium Enterprises (SMEs)
- Corporate Organizations
- Government & NGOs
- Startups & Entrepreneurs
- Individuals & Communities

ABOUT US

Twenties IT Solutions is a technology company, as well as a representation of a dream, resilience and passion for creative innovations. **Founded in January 2013 by Selma Kristof**, the company started in a small rented room with her four (4) younger siblings. It started as a simple journey of fixing computers and designing graphics and soon evolved into a full-service digital and multimedia company.

With an academic background in **Business Information Systems(Honours), Software Engineering with Multimedia(Honours) and an MBA in Marketing**, Selma built a company that uniquely combines technical expertise with creative and marketing excellence.

After returning to Namibia from Malaysia in 2016, she expanded the company's services, integrating IT, multimedia and digital marketing into one powerful offering.

The company was further strengthened when **Hamza Thomas** joined, he has academic background in **Business Administration & Management**, bringing operational leadership and strategic direction. Together, they restructured and positioned Twenties IT Solutions as a reliable and professional brand.

Today, with **over 13 years of experience**, the company delivers innovative, reliable, and personalized solutions that help clients grow and thrive in the digital space.

We believe technology should empower, inspire and connect people and we are committed to making that vision a reality.

2
